M. Gori, G. Monfardini, F. Scarselli, A new model for learning in graph domains, in: Proceedings of IJCNN-05, August 2005. in 1990, and his Ph.D. in Automation and Information

A. Sperduti, A. Starita, Supervised neural networks for the classification of structures, IEEE Transactions on Neural Networks 8 (3) (1997) 714735.

P.A. Flach, N. Lachiche, Naive Bayesian classification of structured data, Machine Learning 57 (3) (2004) 233269.

D.J. Hand, K. Yu, Idiots bayesnot so stupid after all?, International Statistical Review 69 (2001) 385398.

DTI book on DTI: [8]

higher res technology, DSI: [9]

q-ball imaging (between DTI and DSI): [10]

biology human connectome: [11, 12]

neuron level methods papers: [13, 14, 15]

neuroscience finding papers will depend somewhat on the specific covariates we get, as there are many possible papers here. the DTI book has a few in it.

Acknowledgments Joel B. Lande, Carl Craver
